Da sempre produttori di porte automatiche e componentistica per ascensori e con la propria pluriennale esperienza nel settore, **N2S S.r.l.** è ora al tuo fianco per la progettazione e la vendita di **piattaforme elevatrici, ascensori, montacarichi** e tutto ciò che riguarda il trasporto verticale!

Always manufacturer of automatic doors and components for lifts, with its many years of experience in the field, **N2S S.r.l.** is now alongside for the design and sale of **lifting platforms, elevators, freight elevators** and everything related to vertical transport!

Toujours fabricant de portes automatiques et de composants pour ascenseurs, avec ses nombreuses années d'expérience dans le domaine, **N2S S.r.l.** est maintenant aux côtés pour la conception et la vente de **plates-formes de levage, ascenseurs, ascenseurs de fret** et tout ce qui concerne le transport vertical!

Progettazione, assistenza pre e post vendita e manutenzione

Il nostro Team è in grado di seguirvi dal sopralluogo iniziale, allo studio di fattibilità tecnica fino alla consegna dell'impianto... e anche oltre!

Spazi ridotti o irregolari non saranno un problema perché grazie al nostro Team di progettisti siamo in grado di personalizzare il nostro prodotto e renderlo idoneo alle esigenze del singolo.

Inoltre siamo in grado di offrire un pacchetto di manutenzione programmata con una squadra di tecnici italiani specializzati a mantenere al top dell'efficienza il vostro ascensore.

Design, pre and post sales and maintenance assistance

Our Team is able to follow you from the initial inspection, to the study of technical feasibility until the delivery of the plant... and even beyond!

Reduced or irregular spaces will not be a problem because thanks to our Team of designers we are able to customize our product and make it suitable for the needs of the individual.

We are also able to offer a scheduled maintenance package with a team of Italian technicians specialized in keeping your lift at the top of efficiency.

Conception, assistance avant et après vente et maintenance

Notre équipe est à même de vous suivre depuis l'inspection initiale jusqu'à l'étude de la faisabilité technique jusqu'à la livraison de l'usine... et même au-delà!

Des espaces réduits ou irréguliers ne seront pas un problème car grâce à notre équipe de designers, nous sommes en mesure de personnaliser notre produit et de le rendre adapté aux besoins de l'individu.

Nous sommes également en mesure d'offrir un programme de maintenance planifiée avec une équipe de techniciens italiens spécialisés dans le maintien de votre ascenseur au sommet de l'efficacité.

Qualità e garanzia tipiche del Made in Italy

Tutti i nostri prodotti sono certificati e di origine esclusivamente italiana così da poter garantire controllo e durata nel tempo di tutti i componenti utilizzati.

Quality and guarantee typical of Made in Italy

All our products are certified and these are of exclusively Italian origin so we can guarantee control and duration over time of all the components used.

Qualité et garantie typique de Made in Italy

Tous nos produits sont certifiés et sont d'origine exclusivement italienne afin que nous puissions garantir le contrôle et la durée dans le temps de tous les composants utilisés.

Rispetto della normative vigenti in materia di sicurezza del trasporto verticale

I nostri prodotti sono costantemente sottoposti a controlli per garantire al Cliente il rispetto delle normative vigenti di legge, ma in primis la **sicurezza** del cliente stesso!

Sistemi anti blackout con ritorno al piano in caso di assenza di elettricità, teleallarme con combinatore telefonico in grado di chiamare fino a 9 diversi numeri in caso di emergenza sono solo alcune delle sicurezze che proponiamo per garantirvi un "viaggio verticale" nel massimo del relax.

Compliance with the applicable regulations in vertical transport safety material

Our products are constantly subjected to checks to ensure that all is complies with current legislation, but above all the **safety** of the Customer!

Anti-blackout systems with return to the floor in case of power failure, telealarm with telephone dialer able to call up to 9 different numbers in case of emergency are just some of the security we offer to ensure a "vertical journey" in maximum relaxation.

Respect de la réglementation applicable en matière de sécurité du transport vertical

Nos produits sont constamment soumis à des contrôles pour s'assurer que tout est conforme à la législation en vigueur, mais surtout à la **sécurité** du Client!

Systèmes anti-blackout avec retour au sol en cas de panne de courant, téléalarme avec numéroteur téléphonique pouvant appeler jusqu'à 9 numéros différents en cas d'urgence ne sont que quelques-unes des sécurités que nous proposons pour assurer un "voyage vertical" en détente maximale.

Innovazione e tecnologia ai massimi livelli

Prodotti sempre all'avanguardia e di alta qualità, innovazione continua, attenzione costante all'evoluzione tecnologica.

Ciò permette ad **N2S Srl** di essere sempre al passo con l'efficienza in ogni settore.

Al primo posto è sempre il Cliente: fornire alle unità di vendita N2S soluzioni di alta qualità e un servizio professionale è un obiettivo primario.

Innovation and technology at the highest levels

Always cutting-edge products and high quality, continuous innovation, constant attention to technological evolution.

This allows **N2S Srl** to always keep up with the efficiency in every sector.

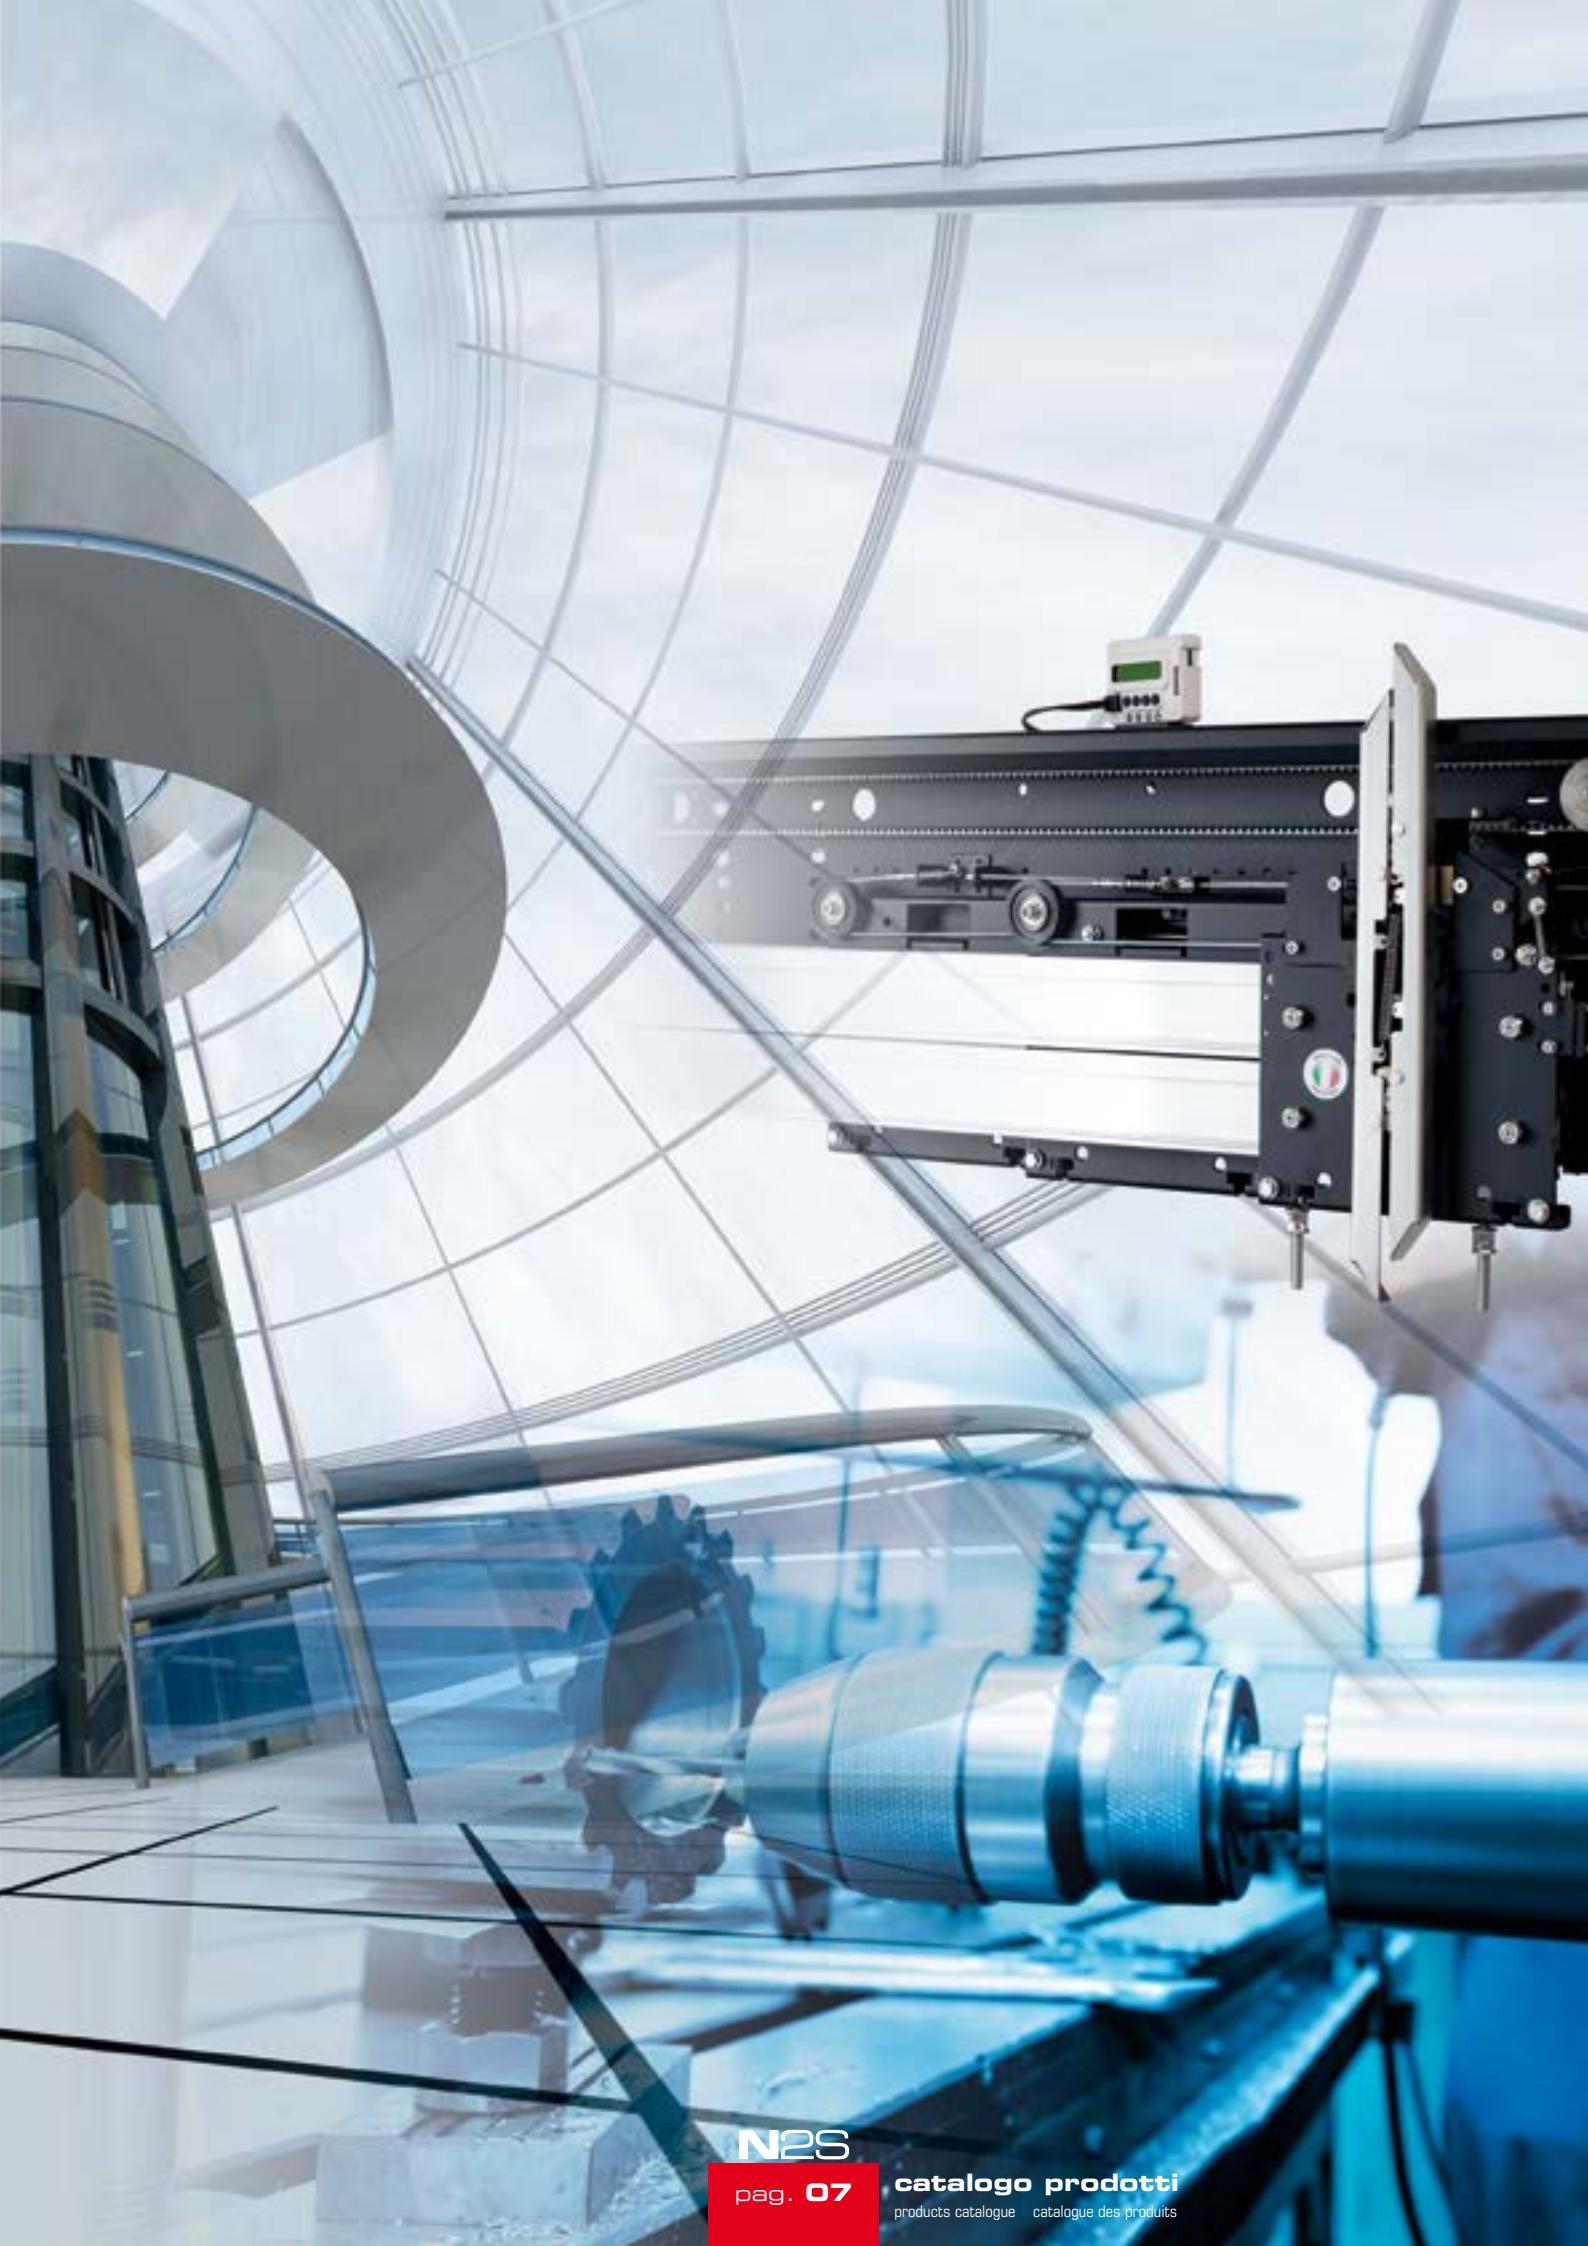

The Customer always comes first: providing high quality solutions to the N2S sales units and a professional service is a primary goal.

Innovation et technologie au plus haut niveau

Toujours des produits de pointe et de haute qualité, l'innovation continue, une attention constante à l'évolution technologique.

Ceci permet à **N2S Srl** de toujours suivre l'efficacité dans tous les secteurs.

Le Client vient toujours en premier: fournir des solutions de haute qualité aux unités de vente N2S et un service professionnel est un objectif primordial.

Excellent value for money

Thanks to our long-standing presence in the field, we are able to bring together the best price with the quality of the most prestigious brands in the industry, guaranteeing the customer an exclusive quality/price ratio.

Excellent rapport qualité prix

Grâce à notre présence de longue date sur le terrain, nous sommes en mesure de réunir le meilleur prix avec la qualité des marques les plus prestigieuses de l'industrie, garantissant au client un rapport qualité/prix exclusif.

TECHNICAL FEATURES

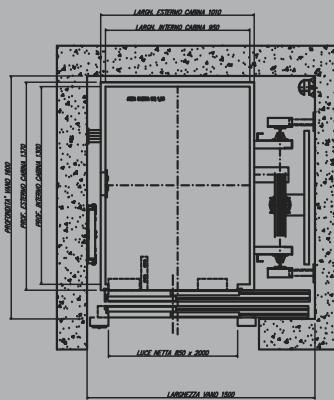

- Flow: 350 Kg
- Capacity: 4 Per.
- Speed: 0.62 m/sec
- Size: 2:1
- Power unit power: 4.7 kW c.ca
- Power supply: 380 V Trifase

MAIN USE

- Condominium of maximum 5 stops
- Private residences
- Low traffic passenger buildings

ADVANTAGES

- Low cost of the system
- Lower management costs
- Greater resistance over time
- Lesser components in "game"
- Faster and easier assembly

TECHNICAL FEATURES

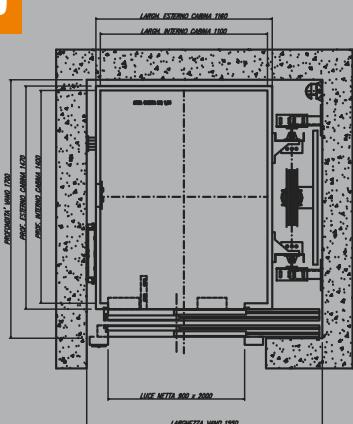

- Flow: 480 Kg
- Capacity: 6 Per.
- Speed: 0.62 m/sec
- Size: 2:1
- Power unit power: 6.7 kW c.ca
- Power supply: 380 V Trifase

MAIN USE

- Condominium of maximum 5 stops
- Private residences
- Low traffic passenger buildings

ADVANTAGES

- Low cost of the system
- Lower management costs
- Greater resistance over time
- Lesser components in "game"
- Faster and easier assembly

TECHNICAL FEATURES

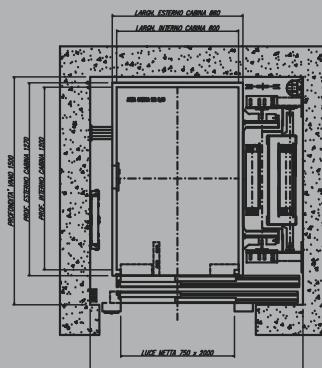

- Flow: 630 Kg
- Capacity: 8 Per.
- Speed: 0.62 m/sec
- Size: 2:1
- Power unit power: 8.7 kW c.ca
- Power supply: 380 V Trifase

MAIN USE

- Condominium of maximum 5 stops
- Private residences
- Low traffic passenger buildings

ADVANTAGES

- Low cost of the system
- Lower management costs
- Greater resistance over time
- Lesser components in "game"
- Faster and easier assembly

TECHNICAL FEATURES

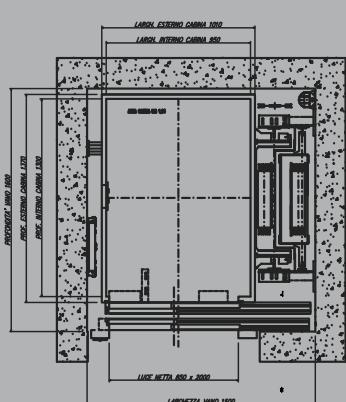

- Flow: 350 Kg
- Capacity: 4 Per.
- Speed: 1.00 m/sec e oltre
- Size: 1:2
- Power unit power: 3.7 kW c.ca
- Power supply: 380 V Trifase
- Also available in single-phase version 220 V

MAIN USE

- Office
- Public buildings
- High traffic passenger buildings
- Tall buildings and/or with stops exceeding 5

ADVANTAGES

- Higher speed compared to an oleodynamic one
- Current in the minor starting phase
- Possibility of having the same system in single-phase version
- Suitable for high rides
- Suitable for handling heavy passenger traffic

TECHNICAL FEATURES

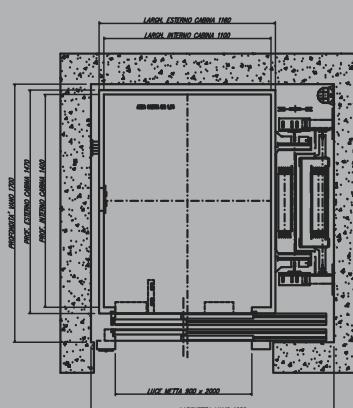

- Flow: 480 Kg
- Capacity: 6 Per.
- Speed: 1.00 m/sec e oltre
- Size: 1:2
- Power unit power: 4.2 kW c.ca
- Power supply: 380 V Trifase
- Also available in single-phase version 220 V

MAIN USE

- Office
- Public buildings
- High traffic passenger buildings
- Tall buildings and/or with stops exceeding 5

ADVANTAGES

- Higher speed compared to an oleodynamic one
- Current in the minor starting phase
- Possibility of having the same system in single-phase version
- Suitable for high rides
- Suitable for handling heavy passenger traffic

TECHNICAL FEATURES

- Flow: 630 Kg
- Capacity: 8 Per.
- Speed: 1.00 m/sec e oltre
- Size: 1:2
- Power unit power: 5.2 kW c.ca
- Power supply: 380 V Trifase
- Also available in single-phase version 220 V

MAIN USE

- Office
- Public buildings
- High traffic passenger buildings
- Tall buildings and/or with stops exceeding 5

ADVANTAGES

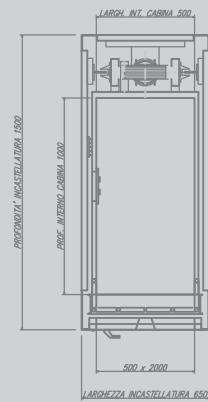

- Higher speed compared to an oleodynamic one
- Current in the minor starting phase
- Possibility of having the same system in single-phase version
